

## Community Forum

Encourage constructive discussion, engage your patient and increase the treatment success with forum communities.

1

All of the data from Community Forums resides on the HIPAA-secure server.

2

Community forums may be used as a group of patients and/or as a group of providers that want to share experiences.

3

Providers can add their patients or other providers to a forum within the Adaptive Telehealth platform.

4

Groups can be made for many topics and are monitored by the provider and/or supervisor. By monitoring the provider/supervisor can view all the messages, make comments and remove comments.

5

If a member is uncomfortable with a post, it can be flagged. The flag removes the post from a thread until it is approved by a provider/supervisor, that receives an alert as soon as the post was flagged.

Not sure where to begin?

We are always here for you. If you have any questions, our support team is happy to talk.
